

IndoX Energy — Website Blueprint

Sep 24, 2026 · @Pulkit Singhal

Overview

The IndoX website launches with **24 pages** that follow the client's own content structure: separate Products and Services sections, with deliberate overlap between them for search coverage.

Item	Decision
Client	IndoX Energy Private Limited
Positioning	From Fuel Supply to Fuel Intelligence: Source → Deliver → Store → Dispense → Monitor → Analyze
Primary audience	Builders, contractors, factories, mining, logistics and fleet operators, telecom tower operators, commercial facilities
Secondary audience	EV charging hosts: hotels, highways, residential societies, fleet depots, parking operators
Primary goal	Qualified B2B quote requests (fuel type, monthly volume, site location)
Secondary goals	Click-to-call and WhatsApp enquiries, EV site-survey requests, SEO for bulk diesel and doorstep delivery searches
Reference sites	jambharat.com and unnatifuels.com
Page count	24 (plus Privacy and Terms)

What we take from the reference sites and what we avoid:

- Take from Unnati: clear CTAs, WhatsApp float button, office map links, alt text on every image.
- Avoid from JamBharat: nine thin product pages, inflated counters, fake-looking testimonials, dead "#" links, Gmail address, same meta description on every page.

- Avoid from Unnati: no team or company details, no proof of work, bank details with no verification process.
- Beat both: separate Products and Services sections, a Technology dashboard demo and coverage map on Home, a full trust section on About Us, and a proper quote form.

Sitemap at a glance

Eight menu sections hold all 24 pages; Products and Services each have an overview page plus sub-pages.

```

flowchart LR
    H[Home] --> A[About Us]
    H --> P[Our Products]
    H --> S[Our Services]
    H --> E[EV Charging Solutions]
    H --> I[End-to-End Energy<br/>Infrastructure]
    H --> B[Blog]
    H --> C[Contact Us]
    B --> B1[Blog article template]
    C --> C1[Thank-you]
    C --> C2[Payments]
  
```

Products and Services sub-pages are listed in the table below rather than the diagram.

#	Page	URL	Main job
1	Home	/	Explain IndoX in 10 seconds, route each buyer to the right product or service
2	About Us	/about	Story, values, Quality & Safety, Commitment, Company Profile
3	Our Products (overview)	/products	All 5 products at a glance
4	HSD / Diesel Supply	/products/hsd-diesel-supply	Bulk HSD for commercial and industrial users
5	Bulk Fuel & Oil Supply	/products/bulk-fuel-oil-supply	HSD, 10ppm ULSD, MHO, MTO, LDO, Biodiesel

#	Page	URL	Main job
6	Smart Diesel Storage Tanks	/products/smart-diesel-storage-tanks	Tanks with ATG, live monitoring, app
7	Fuel Dispensing Units	/products/fuel-dispensing-units	Controlled on-site fueling equipment
8	Fuel Bowser / Mobile Fuel Solutions	/products/fuel-bowser	The bowser itself: capacity, metering, GPS, safety
9	Our Services (overview)	/services	All 7 services at a glance
10	Doorstep / Site Diesel Delivery	/services/doorstep-diesel-delivery	Booking and receiving fuel at your site
11	Bulk Fuel Supply	/services/bulk-fuel-supply	How IndoX sources, transports and delivers large volumes
12	Fuel Inventory Management	/services/fuel-inventory-management	Opening stock to variance, tracked digitally
13	Fuel Monitoring & IoT Solutions	/services/fuel-monitoring-iot	ATG, IoT, GPS, RFID, dashboard
14	Tank Fabrication & Installation	/services/tank-fabrication-installation	Design → Commissioning
15	Fuel Theft & Loss Prevention	/services/fuel-theft-prevention	Alerts on unusual movement and stock variation
16	Fuel Management Solution	/services/fuel-management-solution	Manual records to digital fuel management
17	EV Charging Solutions	/ev-charging	AC/DC chargers, turnkey setup, locations
18	End-to-End Energy Infrastructure	/end-to-end-energy-infrastructure	One-partner ecosystem + Business Model
19	Blog	/blog	Articles for SEO and buyer education
20	Blog article template	/blog/[slug]	One layout for every post

#	Page	URL	Main job
21	Contact Us	/contact	Quote form, contact channels, coverage note
22	Payments	/payments	Verified ways to pay an invoice (footer only)
23	Thank-you	/thank-you	Confirms request, fires ad conversions
24	404	—	Recovers lost visitors

How the overlap pages differ: each pair shares a topic but not copy. Product pages describe *what IndoX supplies or installs*; service pages describe *how IndoX does it for you*. Every page gets its own title, meta description and wording so Google indexes all of them.

Navigation

The header carries seven menu items and an always-visible Get a Quote button; Products and Services open mega menus.

Header (desktop)

Position	Item	Behaviour
Left	IndoX logo	Links to Home
Menu 1	About Us	Direct link
Menu 2	Our Products ▼	Mega menu: 5 product cards with icon and one line, plus "View all products" to the overview
Menu 3	Our Services ▼	Mega menu: 7 services in two columns, plus "View all services"
Menu 4	EV Charging	Direct link
Menu 5	End-to-End Infrastructure	Direct link
Menu 6	Blog	Direct link
Menu 7	Contact Us	Direct link
Right	Toll-free 1800-202-1200	Click-to-call

Position	Item	Behaviour
Right	Get a Quote button	Opens /contact with the form in view

Seven items is tight on laptop screens. If it crowds, End-to-End Infrastructure moves under About Us as a dropdown item.

Mobile

- Top bar: logo, call icon, menu icon.
- Full-screen menu; Products and Services expand in place.
- Sticky bottom bar on every page: Call · WhatsApp · Get a Quote.

Footer (5 columns + bottom strip)

Column	Contents
1. Brand	Logo, tagline, LinkedIn and other socials, newsletter signup
2. Products	5 product pages
3. Services	7 service pages
4. Company	About Us, EV Charging, End-to-End Infrastructure, Blog, Contact
5. Contact	Registered address, toll-free number, info@indoxenergy.com, WhatsApp, map link
Bottom strip	© IndoX Energy Pvt Ltd · CIN · GSTIN · Privacy · Terms · Payments · "All supply subject to applicable laws, approvals and permissions."

Global elements

These components appear on every page, so each is designed once and reused.

Element	Where	Details
Sticky header	All pages	As in Navigation

Element	Where	Details
WhatsApp float	All pages, bottom right (desktop)	Pre-filled message: "Hi IndoX, I need a quote for..."
Mobile action bar	All pages on mobile	Call · WhatsApp · Get a Quote
Quote CTA band	Bottom of every page except Contact, Payments, legal	Headline, one line, Get a Quote + Call buttons
Mini quote form	Product, Service and EV pages	4 fields: Name, Phone, Requirement (pre-selected to the page), City. Full form stays on /contact
Breadcrumbs	All inner pages	Home › Our Services › Doorstep Diesel Delivery
Trust strip	Home, Product and Service pages, Contact	Authorized sourcing · PESO-compliant equipment · Metered, documented delivery · GST invoicing
Compliance line	Footer + under every product or delivery claim	"Subject to applicable regulations, location, product and quantity"
Cookie notice	First visit	Minimal bar, decline option
Tracking	Site-wide	GA4, Meta Pixel, Google Ads tag, conversion events on form submit, call click, WhatsApp click
SEO per page	All pages	Unique title and meta description, LocalBusiness + Organization schema, Product schema on Products, Article schema on posts, FAQ schema where FAQs exist

Page 1 — Home

Home has 13 sections and absorbs six content blocks that don't get their own page: Our Approach, Our Technology, Industries We Serve, Customer Segments, Pan-India Network and Why IndoX.

#	Section	Layout	Content source
1	Hero	Full-width browser visual or video; headline, subline, Get a Quote + Explore Services buttons	Tagline + intro paragraph
2	Trust strip	4 icon points	Quality & Safety (short)
3	Our Approach	Interactive 6-step flow: Source → Deliver → Store → Dispense → Monitor → Analyze	Our Approach
4	Our Products	5 cards with image and one line, "View all products"	Our Products
5	Our Services	7 compact tiles with icon, "View all services"	Our Services
6	Our Technology	Split: tech stack chips (ATG, IoT, GPS, RFID, Dashboard, App, Analytics, Alerts) + dashboard mockup labelled "Sample"	Our Technology
7	EV Charging teaser	Charger image, 3 points, link to EV page	EV Charging Solutions
8	Industries We Serve + Customer Segments	7 industry tiles, with a segments strip underneath (builders, contractors, factories, fleets, telecom)	Industries We Serve + Customer Segments
9	End-to-End teaser	Ecosystem strip, link to End-to-End page	End-to-End Energy Infrastructure
10	Pan-India Network	India map with active and expanding regions, city availability check	Pan-India Network
11	Why IndoX Energy	6 points in a 3×2 grid	Why IndoX Energy
12	Latest from the blog	3 article cards	Blog

#	Section	Layout	Content source
13	Quote CTA band	Global component	Contact

Rule: no invented counters, client logos or testimonials. A proof section is added only when the client supplies real data.

Page 2 — About Us

About Us is the trust page: it absorbs Quality & Safety, Our Commitment and Company Profile, so a buyer finds every credibility signal in one place.

#	Section	Layout	Content source
1	Hero	"Powering businesses with reliable energy solutions" + short intro	About Us
2	Our story	2–3 paragraphs + a real photo of the fleet or site	About Us
3	Vision & Mission	Two side-by-side cards	Our Vision, Our Mission
4	Core Values	6 icon tiles: Safety · Reliability · Transparency · Technology · Service · Growth	Core Values
5	Leadership	Founder and key team: photo, name, role, LinkedIn	To collect from client
6	Quality & Safety	9-point commitments grid + annotated bowser image showing extinguisher, hazmat panel, metered DU, valve box	Quality & Safety
7	Licences & certifications	Cards with document name and number, viewable on click; real documents only	To collect from client
8	Our Commitment	6 points: Reliable Supply, Smart Technology, Operational Transparency, Safety, Customer Support, Long-Term Partnerships	Our Commitment

#	Section	Layout	Content source
9	Company Profile	Table: legal name, CIN, GSTIN, registered office, industry, core business, customer base, service model, geographic vision, positioning + Download Company Profile (PDF)	Company Profile
10	Quote CTA band	Global	—

Pages 3–8 — Our Products

Products answers "what does IndoX supply or install?"; each sub-page is about the thing itself: what it is, specs, where it's used.

Page 3 — Products overview (/products)

1. Hero: "Fuel and fuel infrastructure for business."
2. 5 large product cards: image, 2 lines, "Explore" link.
3. "Products + services together" strip: how each product connects to a service (e.g. Smart Tanks → Tank Fabrication & Installation).
4. Quote CTA band.

Pages 4–8 — Shared product template

#	Block	Purpose
1	Hero	Product name, one-line promise, product image, Enquire button + mini form
2	Overview	What it is, 1 paragraph
3	Key features / specs	Icon grid or spec table
4	Applications	Chips or tiles of where it's used
5	Related service	Card linking to the matching service page
6	Safety & compliance note	One line + link to About › Quality & Safety
7	FAQs	4–6 questions, FAQ schema
8	Other products	4 cards

#	Block	Purpose
9	Quote CTA band	Global

What each product page carries

Page	Features / specs (block 3)	Applications (block 4)	Related service
4. HSD / Diesel Supply	Bulk HSD for eligible commercial and industrial customers; authorized sources; supply per regulations	Construction, DG sets, manufacturing, infrastructure, mining, logistics, telecom, agriculture	Bulk Fuel Supply
5. Bulk Fuel & Oil Supply	Product cards: HSD, 10ppm ULSD, MHO, MTO, LDO, Biodiesel/Biofuel, other industrial oils	Industrial heating, solvents, machinery, fleets	Bulk Fuel Supply
6. Smart Diesel Storage Tanks	Storage tank, ATG, live level monitoring, consumption tracking, digital reports, alerts, dispensing management, theft monitoring, GPS/IoT, app + dashboard	Sites needing on-site storage and controlled dispensing	Tank Fabrication & Installation
7. Fuel Dispensing Units	Professional DUs, integration with fuel-management tech	Fleets, construction, industrial, DG sets, mining, infrastructure, commercial	Fuel Management Solution
8. Fuel Bowser / Mobile Fuel Solutions	Bulk transport, site delivery, mobile fueling, metered dispensing, delivery documents, GPS	Remote sites, fleets, projects without storage	Doorstep / Site Diesel Delivery

Pages 9-16 — Our Services

Services answers "how will IndoX handle this for me?"; each sub-page is about the process, the outcome and what the customer gets.

Page 9 — Services overview (/services)

1. Hero: "Fuel at your site. Less downtime. Better fuel management."
2. 7 service cards in a grid, grouped as Supply (Doorstep Delivery, Bulk Supply), Infrastructure (Tank Fabrication & Installation) and Intelligence (Inventory, Monitoring & IoT, Theft Prevention, Fuel Management).
3. Quote CTA band.

Pages 10-16 — Shared service template

#	Block	Purpose
1	Hero	Service name, promise, image, Get a Quote + mini form
2	The problem	3 pain points (downtime, pilferage, manual records)
3	What we do	Feature grid
4	How it works	Numbered process strip
5	Benefits	3-4 outcome cards
6	Who it's for	Industry chips
7	Related product	Card linking to the matching product page
8	FAQs	4-6 questions, FAQ schema
9	Other services	3 cards
10	Quote CTA band	Global

What each service page carries

Page	What we do (block 3)	How it works (block 4)	Related product
10. Doorstep / Site Diesel Delivery	Delivery to eligible sites through an organized network; Fuel at Your Site · Less Downtime · Better Fuel Management	Book → Schedule → Dispatch → Metered fill → Delivery documents	Fuel Bowser
11. Bulk Fuel Supply	Coordinated procurement, transport and delivery for large quantities	Requirement → Sourcing → Quote → Dispatch → Delivery → Invoice	Bulk Fuel & Oil Supply
12. Fuel Inventory Management	Tracks opening stock, received, dispensed, closing stock, daily and equipment-wise consumption, delivery records, variance	Setup → Daily capture → Reconciliation → Reports	Smart Diesel Storage Tanks
13. Fuel Monitoring & IoT Solutions	ATG, IoT, GPS, RFID, sensors, cloud monitoring, app, dashboard, analytics, alerts	Sensors → Cloud → Dashboard → Alerts	Smart Diesel Storage Tanks
14. Tank Fabrication & Installation	End-to-end storage infrastructure to technical, safety and regulatory requirements	Design → Fabrication → Installation → Piping → Dispensing → Automation → Testing → Commissioning	Smart Diesel Storage Tanks
15. Fuel Theft & Loss Prevention	Flags unusual movement, unauthorized dispensing, stock variation, potential losses	Monitor → Detect → Alert → Investigate → Report	Fuel Dispensing Units

Page	What we do (block 3)	How it works (block 4)	Related product
16. Fuel Management Solution	Moves businesses from manual to digital fuel records	Fuel Receipt → Storage → Dispensing → Monitoring → Reporting → Analytics	Fuel Dispensing Units

Pages 17-18 — EV Charging and End-to-End Infrastructure

EV Charging serves a separate buyer (property and fleet owners), and End-to-End ties everything together and carries the Business Model.

Page 17 — EV Charging Solutions (/ev-charging)

1. Hero: "Powering the transition to electric mobility" + charger visual, Book a Site Survey button.
2. Our EV solutions: AC chargers, DC fast chargers, OCPP integration, RFID / QR / digital payments, monitoring platform, AMC & support.
3. How it works: Site Survey → Load & Electrical Planning → Civil & Electrical Work → Installation → Testing & Commissioning → AMC.
4. Suitable locations: 8 tiles — highways, commercial complexes, hotels & restaurants, petrol pumps, fleet depots, residential societies, industrial facilities, parking.
5. AC vs DC comparison table (speed, use case, typical location).
6. FAQs with schema.
7. CTA band: "Host an IndoX charger."

Page 18 — End-to-End Energy Infrastructure (/end-to-end-energy-infrastructure)

1. Hero: "One partner. Multiple energy solutions."
2. Ecosystem flow: Fuel Supply → Transportation → Storage → Dispensing → Digital Monitoring → Fuel Management → EV Charging; each step links to its product or service page.
3. Our Business Model: 4 cards — Supply Model, Infrastructure Model, Technology Model, Integrated Model — each with "best for" examples.
4. "Build your package" selector: pick needs, get the recommended model.
5. Quote CTA band.

Pages 19-20 — Blog

The blog launches with at least 6 articles so it never looks empty, then grows by 2 posts a month.

Page 19 — Blog listing (/blog)

1. Hero: "Fuel intelligence insights" + search bar.
2. Category chips: Fuel Management · Diesel Supply · Storage & Safety · EV Charging · Industry Guides · Company News.
3. Featured article: large card across the top.
4. Article grid: 3 columns desktop, 1 on mobile; each card shows image, category, title, 2-line excerpt, read time, date.
5. Newsletter signup band.
6. Pagination after 9 posts.

Page 20 — Blog article template (/blog/[slug])

Block	Details
Header	Category, title, author with photo, date, read time, hero image
Table of contents	Sticky on the left (desktop), collapsible on mobile
Body	Headings, images, pull quotes, tables, callout boxes
In-article CTA	After the 2nd section: a card linking to the matching product or service page
Share bar	LinkedIn, WhatsApp, copy link
Author box	Name, role, one line
Related articles	3 cards
Quote CTA band	Global

Launch articles (6, each targets a search people actually make)

#	Working title	Links to
1	How construction sites lose diesel — and how to stop it	Fuel Theft & Loss Prevention
2	Doorstep diesel delivery vs buying from a pump: cost comparison for businesses	Doorstep / Site Diesel Delivery
3	What is Automated Tank Gauging (ATG) and does your site need it?	Smart Diesel Storage Tanks
4	HSD vs LDO vs MHO: which fuel does your equipment need?	Bulk Fuel & Oil Supply
5	Setting up an EV charger at your hotel or society: a step-by-step guide	EV Charging Solutions
6	Fuel safety checklist for DG sets and on-site storage	About Us (Quality & Safety)

Page 22 — Payments

Payments is for existing customers paying an IndoX invoice, and it is built to stop impersonation fraud rather than invite it.

Unnati's payments page shows bank details with a warning that suggests fraudsters have already used its name. Fuel and bowser businesses are common targets for this, so this page leads with verification.

Layout (/payments)

1. Hero: "Pay your IndoX invoice securely."
2. Fraud notice, shown first and prominently: IndoX never asks for advance payment on WhatsApp or from personal numbers; pay only against a GST invoice; verify on 1800-202-1200 before paying a new account.
3. Option A — Pay online (recommended): invoice number + amount + GSTIN fields, then a Razorpay checkout (UPI, cards, net banking). Receipt emailed automatically.
4. Option B — Bank transfer / UPI: company account name (IndoX Energy Private Limited), bank, IFSC, and UPI QR in the company's name only. Account number shown after the invoice number is entered, not in public page text.

5. After you pay: send the UTR / reference to accounts email; confirmation within 1 working day.
6. Payment FAQs: credit terms, TDS, GST invoice copies, refunds.
7. Accounts contact: dedicated accounts email and phone.

Rules

- Linked from the footer and from invoices only; not in the main nav, since buyers shouldn't see "payment" before a quote.
- No advance-payment, franchise-fee or investment language anywhere on the site.
- Page set to noindex so it does not appear in search results, which reduces copycat pages.

Pages 21, 23, 24 — Contact, Thank-you, 404 (+ Legal)

The quote form is the site's main conversion point, so it asks enough to qualify a lead without scaring it off.

Page 21 — Contact Us (/contact)

1. Hero: "Let's power your business."
2. Split layout: left, the smart quote form; right, contact cards (toll-free, WhatsApp, email, registered office with map).
3. Quote form, 2 steps:
 - a. Step 1 — What do you need? Solution (multi-select), product, estimated monthly volume in litres (slider or ranges), delivery city / PIN.
 - b. Step 2 — About you: name, company, phone, email, industry, message. Consent checkbox linked to Privacy.
4. Response promise: "Our team calls back within X working hours" (client to set X).
5. Office locations with map embed, plus a Pan-India Network note: "Check if we deliver to your city" with a city/PIN field.

Page 23 — Thank-you (/thank-you)

- Confirmation message with the request summary.
- What happens next: 3 steps (call back, requirement check, quote).
- WhatsApp button for urgent needs.
- 2 relevant blog articles.
- Fires GA4, Meta and Google Ads conversion events.

Privacy Policy and Terms (/privacy, /terms)

- Plain text pages with a table of contents; drafted to cover form data, cookies, tracking pixels, WhatsApp communication and payments.
- To be reviewed by the client's legal adviser before launch.

Page 24 — 404

- Branded illustration (an empty fuel gauge), one line of copy, links to Home, Solutions and Contact.

Decisions to lock with the client

These 10 answers are needed before page content is written; items 1–5 block design as well.

- ☐ **Final logo:** the lightning-"o" and leaf-"X" mark, or the plain "IndoX" wordmark used on the trucks?
- ☐ **Lead tagline:** "Powering Sustainable Energy" (logo) or "Fueling Progress • Powering Growth" (content)?
- ☐ **Photos:** most supplied truck, pump and charger images are AI-generated (garbled truck text, placeholder number 1800-123-4567). Real photos of fleet, tanks and sites, or use these labelled as concept renders?
- ☐ **Retail fuel station:** the pump image implies IndoX runs retail outlets. Does it? If not, the image stays off the site.
- ☐ **"Repos Portable Station" tank photo:** confirm IndoX has the right to show this third-party product as its own.
- ☐ **Trust details:** registered address, CIN, GSTIN, founders and team, licences and certificate numbers.
- ☐ **Proof:** real client names or logos, delivery volumes, testimonials with permission. None = the proof section stays hidden.
- ☐ **Coverage:** which cities or states are active today, which are "expanding".
- ☐ **Payments:** payment gateway account (Razorpay or other), accounts email and phone, credit terms.
- ☐ **Language:** English only, or English + Hindi toggle?
